WHO AM I

I am a front-end developer with extensive experience in React, Vue, and TypeScript. I have spent a year working as a frontend engineer at Okestro, a Platinum member of OpenStack in Korea. I thrive in fast-paced environments where I can quickly adapt and learn through hands-on experience rather than just theoretical knowledge. I believe that real-world experience, whether good or bad, is invaluable, and I approach every challenge with enthusiasm and determination.

SKILLS

Next.js | React.js | Vue.js | JavaScript | TypeScript
HTML5 | CSS | TailwindCSS | React query | Axios | AdobeXD

PROFESSIONAL EXPERIENCE

OKESTRO (Seoul, South Korea)
Web Front-end Engineer

Sep 2023 - Present

In-House Solution Development

- I developed our in-house solution using cloud-based OpenStack.
- Implemented a user interface for managing a virtualized environment based on software-defined computing and networking.
- Supported easy management by visualizing relevant data for users.
- Developed functionalities to collect and process data, enabling the management of the virtual machine lifecycle.
- Implemented software-based network load balancing.

Hana Bank Project

- I developed functionalities to efficiently manage Cisco network services on Hana Bank's admin site.
 - Developed a dashboard page to visualize the current status of the network.
 - Created features to collect and process data, allowing users to view lists and detailed information.
 - Implemented functionalities to manage Cisco network resources through data registration, linking, modification, and backup.
 - Developed a feature to ensure consistency between Hana Bank's admin data and Cisco's site data.
 - Enabled the input and storage of protocol, hostname, path, ID, and password for each data point, allowing administrators to verify these settings on the Hana Bank admin interface.
-

EDUCATION

Fanshawe College, London, Ontario, Canada

Graduate Diploma in Web development and Internet applications, April, 2023
